

Table of Contents

Executive Summary 1

ES.1 Introduction..... 1

 ES.1.1 Project Description and Location 2

 ES.1.2 Purpose and Need for Action 2

 ES.1.3 Report Purpose and Organization..... 6

ES.2 Summary of Findings 6

 ES.2.1 Existing Travel Patterns 6

 ES.2.2 Existing Conditions..... 7

 ES.2.3 Future Conditions and Needs (No-Build Alternative) 11

 ES.2.4 Performance of Build Alternatives..... 20

 ES.2.5 Summary of Alternatives Performance Comparison..... 38

 ES.2.5.1 AM Peak Period 38

 ES.2.5.2 Peak Period..... 43

List of Acronyms i

Glossary of Commonly Used Terms v

CHAPTER 1. Existing Conditions..... 1-1

1.1 Roadway Network..... 1-1

 1.1.1 I-66 Corridor 1-1

 1.1.2 Interchanges and Intersecting Roadways..... 1-3

 1.1.3 HOV and Commuter Facilities..... 1-9

1.2 Traffic Volumes and Operations..... 1-10

 1.2.1 Data Collection 1-11

 1.2.2 Historical Traffic Trends 1-11

 1.2.3 Daily Traffic Volumes 1-12

 1.2.4 Peak Period Traffic Volumes and Peaking Patterns 1-16

 1.2.5 Baseline VISSIM Model 1-27

 1.2.6 Traffic Operations Results and Findings..... 1-28

 1.2.7 Summary of Roadway Deficiencies 1-52

CHAPTER 2. Transit/Transportation Demand Management..... 2-1

2.1 Existing Conditions..... 2-1

2.2 Summary of Public Surveys..... 2-3

2.3 Plan Development Process..... 2-3

2.4	Transit Service Types	2-4
2.5	Draft Preferred Transit/TDM Plan	2-5
2.5.1	Transit Service	2-5
2.5.2	Park-and-Ride Facilities	2-8
2.5.3	Transportation Demand Management	2-8
2.6	Summary and Next Steps	2-9
CHAPTER 3. Local and Regional Transportation Plans		3-1
3.1	Fairfax County Comprehensive Plan	3-1
3.2	Fairfax County Transportation Plan	3-1
3.3	Prince William Comprehensive Plan	3-1
3.4	Prince William Transportation Plan	3-1
3.5	Long-Range Transportation Plan for National Capital Region	3-2
3.6	Transportation Vision Plan	3-2
3.7	TransAction 2040	3-2
CHAPTER 4. Development of Alternatives		4-1
4.1	Introduction	4-1
4.2	Alternatives Developed During the Tier 1 EIS	4-1
4.2.1	Recommended Improvement Strategies	4-1
4.2.2	Tier 1 Alternatives Carried Forward to Tier 2 EA	4-4
4.3	Mainline and Access Point Alternatives Developed During the Tier 2 EA	4-4
4.3.1	Range of Improvement Concepts Considered	4-4
4.3.2	Planning and Operational Assumptions	4-5
4.3.3	Mainline Roadway Configurations	4-5
4.3.4	Direct Express Lane Access Points and Crossovers	4-8
4.4	Interchange Improvement Concepts Considered During the Tier 2 EA	4-16
4.4.1	Existing Interchange Locations	4-16
4.4.2	Proposed Interchange Locations	4-17
4.4.3	Interchange Concepts Considered	4-17
4.5	Alternatives Carried Forward for Further Analysis	4-17
CHAPTER 5. Safety and Crash Analysis		5-1
5.1	Introduction and Background	5-1
5.2	Safety Analysis Methods and Tools	5-1
5.2.1	Qualitative Safety Analysis Methods and Tools	5-1
5.2.2	Quantitative Safety Analysis Methods and Tools	5-2
5.3	Safety Analysis Areas and Zones	5-3

5.4	Safety Data Collection.....	5-6
5.4.1	Crash Data	5-6
5.4.2	Roadway Inventory Data.....	5-7
5.5	Crash History and Safety Analysis.....	5-7
5.5.1	Qualitative Corridor Safety Analysis.....	5-7
5.5.2	Quantitative Corridor Safety Analysis	5-23
5.6	Future Alternative Conditions Safety Evaluation.....	5-30
5.6.1	Evaluation Approach and Process.....	5-30
5.6.2	ISATe Analysis Evaluations	5-30
5.7	Future Safety Considerations – No-Build and Build.....	5-39
5.7.1	Signing and Pavement Markings	5-39
5.7.2	Design for Merging and Diverging Areas	5-39
5.7.3	Interchange Geometry and Configuration.....	5-39
5.7.4	Recurring Congestion	5-40
5.7.5	Mainline Shoulders.....	5-40
5.7.6	Guardrail and Barriers.....	5-41
5.8	Safety Analysis Conclusions	5-41
CHAPTER 6. Assessment of Future Conditions.....		6-1
6.1	Background Transportation Projects.....	6-1
6.1.1	US 15/I-66 Interchange Reconstruction.....	6-2
6.1.2	US 29/Linton Hall Road Interchange Improvements.....	6-3
6.1.3	I-66 Widening between Gainesville and Haymarket	6-4
6.1.4	Route 234 Bypass Extension (Bi-County Parkway).....	6-5
6.1.5	Route 234 Bypass/Relocated Balls Ford Road Interchange	6-6
6.1.6	Manassas Battlefield Bypass	6-6
6.1.7	Route 28 Corridor Improvements.....	6-8
6.1.8	Fairfax County Parkway Improvements	6-10
6.1.9	Vienna Metrorail Accessibility and Capacity Improvements	6-10
6.1.10	Dulles Corridor Metrorail Silver Line	6-11
6.2	Land Use and Travel Patterns	6-12
6.2.1	Land Use and Socioeconomic Characteristics	6-12
6.2.2	Travel Patterns.....	6-21
6.3	2040 No-Build Scenario	6-27
6.3.1	Traffic Volumes	6-27
6.3.2	2040 No-Build AM Freeway Operations	6-39

6.3.3	2040 No-Build PM Freeway Operations	6-61
6.3.4	No-Build AM Arterial Operations	6-84
6.3.5	No-Build PM Arterial Operations	6-87
6.3.6	No-Build AM/PM Summary of Network Operational Deficiencies and Major Points of Congestion	6-92
6.4	2040 Build 2A Scenario.....	6-94
6.4.1	Traffic Volumes	6-94
6.4.2	Build 2A AM Freeway Operations	6-105
6.4.3	Build 2A PM Freeway Operations	6-135
6.4.4	Build 2A AM Arterial Operations	6-164
6.4.5	Build 2A PM Arterial Operations	6-168
6.4.6	Build 2A AM/PM Summary of Network Operational Deficiencies and Major Points of Congestion	6-174
6.5	2040 Build 2B Scenario.....	6-175
6.5.1	Traffic Volumes	6-175
6.5.2	Build 2B AM Freeway Operations	6-188
6.5.3	Build 2B PM Freeway Operations	6-216
6.5.4	Build 2B AM Arterial Operations	6-241
6.5.5	Build 2B PM Arterial Operations	6-245
6.5.6	Build 2B AM/PM Summary of Network Operational Deficiencies and Major Points of Congestion	6-252
6.6	Arterial Intersection Minor Improvements and other Potential Mitigation Measures	6-254
6.6.1	Future Proposed Arterial Mitigation Measures and Network Optimization	6-254
6.6.2	Build Condition Arterial Network Modifications	6-260
6.7	Comparison of Performance	6-264
6.7.1	AM Peak Period	6-264
6.7.2	PM Peak Period	6-270
